

Filling Systems for the Pharmaceutical Industry

3600 Series, for Pre-Capped Bottles

Automatic Uncapping, Filling & Screw Capping

Rockwell Automation

- PLC Control
- Color Touch Screen HMI
- Servo Motors
- Safety Technology

Servo Controlled
Uncapping
& Recapping

Interlocked Machine Enclosure
(available with HEPA Filtration)

Tray Unloader

HMI Operator Panel
w/ Color Touch Screen

Sanitary Conveyor

The **3600 Series** is truly unique in the industry, as we process "pre-capped" bottles! This machine performs bottle un-capping, liquid filling, and re-capping of the bottle, all on a single frame!

Great for pharmaceutical, diagnostic and other demanding applications in controlled environments.

Process a wide variety of glass & plastic containers with screw caps. Ideal for cost saving pre-sterilized bottles. Capping functions are servo controlled for precise operation and flexibility.

Experience the industry's fastest and cleanest bottle change-over with our patented **ChaseLock®** system.

Benefits:

- cGMP design for easy cleaning and durability.
- Welded frame machine enclosure, Category 3 interlocked side-hinge doors with diagnostics & monitoring.
- Allen-Bradley PLC and Color Touch Screen HMI.
- NEMA 4X electrical panel.
- Up to 5 filling stations.
- Choice of filling systems
- Rugged welded heavy-duty steel machine frame.
- "Functional Monitor Logic" continuously monitors all sensors.
- **ChaseLock®** patented "tool-free" quick bottle changeover in minutes.
- Comprehensive document package with available IQ/OQ protocols, as well as many others options.
